**Dear Friends and Colleagues;**

On behalf of Iranian Society of Knee Surgery, Arthroscopy and Sports Traumatology (ISKAST), I'm very pleased to announce the 5th International Biennial Congress of ISKAST, which will be held from Feb. 14 – 17, 2018.

The venue will be at the Kish Island Convention Center.

The Honorary International Congress Chairman is Prof. Werner Müller, who needs no introduction! Local Scientific Chairman of the Congress is Dr. Hamidreza Yazdi, who is one of the most active orthopedic surgeons and researchers in the field of Knee Surgery and Sports Traumatology. The ISKAST 2018 Congress will include an excellent variety of educational opportunities; such as keynote lectures, scientific paper presentations, debates, seminars, surgical demonstrations, instructional course lectures and technical exhibits.

We hope this event would present as the best opportunity for participants to learn and to share their knowledge and experience with outstanding international faculties.

Kish is a coral island, with serene coastline and pleasantly mild temperature, is a perfect option to skip the cold winter days.

We encourage the congress participants to take advantage of this excellent opportunity to also visit Iran's historical sites in Tehran, Isfahan, Yazd and Shiraz.

We, at ISKAST, welcome the international, regional and national societies, especially from our neighboring countries to the 2018 Congress, and would be happy to allocate symposia for their respected societies.

Thank you in advance and we are looking forward to seeing you in Kish Island in an unforgettable ISKAST 2018 Congress.

ISKAST 2018 Congress President
Dr. Mohammad Razi
ISKAST President

We invite you to attend the 5th International Biannual Meeting of ISKAST, on 14-17 February 2018 in the international convention Centre of Kish Island.

The main objective of this congress will be orthopedic surgeons, sports medicine specialists and related professionals to sports medicine including physiatrists, physiotherapists and other related medical staffs to expand their knowledge and enhance their surgical skills in the field of knee surgery, arthroscopy of joints and all aspects of sports trauma as well as their conservative treatment and surgical techniques and minimally invasive interventions. workshops will allow further interaction with the experts. There will be delegates and In addition to scientific lectures from the world renowned faculty, symposia and hands-on attendees from various societies and countries that will bring their unique perspective into this meeting.

Kish Island is a very beautiful island in Persian Gulf with a nice weather on February. We are certain you and your family, will enjoy attending this congress and look forward to hosting you in Kish.

EDITORIAL

ISKAST; the Way We Have Made and Upfront

Dr. Masaki Watanabe, one of the Japanese orthopedic surgeons, is known as the "father of modern and interventional arthroscopy" after developing sophisticated endoscopic instruments using electronics and optics, which became popular in Japan in the post-World War II era (1). Before him, Professor Kenji Takagi in Tokyo has traditionally been credited with performing the first arthroscopic examination of a knee joint, in 1919. He used a 7.3 mm cystoscope for his first knee arthroscopies (2). In 1969, Dr. Richard O'Connor visited Dr. Watanabe after which he popularized knee arthroscopy in the United States in 1960-70s (3).

The history of arthroscopic surgery in Iran goes back to early 1970s, when Dr. Heshmat Shahriaree was practicing at Shafa Yahyaiean Hospital in Tehran (4, 5). In those years, he was performing his first cases of knee arthroscopy in Tehran using very simple instruments. After the Islamic Revolution in 1979, he left the country and came back to the United States when he published the O'Connor's Textbook of Arthroscopic Surgery in 1984 (6).

During the eight years of the imposed Iraq-Iran war (1980-1988), we were not facilitated to develop and popularize arthroscopic surgeries due to the lack of access to both the knowledge and the devices. In 1990s, with a new generation of Iranian orthopedic surgeons trained in arthroscopy and sport medicine returning from Europe and North America, arthroscopic surgeries became popular again. In 1992, Iranian Society of Knee Surgery, Arthroscopy and Sports Traumatology (ISKAST) was founded and started to grow in the number of the members to become a very

large family of orthopedic surgeons, which further subdivided to knee, shoulder, elbow, ankle, and hip arthroscopy.

At the moment, ISKAST is not only the leading society for the arthroscopic surgeons throughout the country, but is also a scientific reference in the Middle East region. ISKAST has been the partner society of the International Society of Arthroscopy, Knee Surgery and Orthopaedic Sports Medicine (ISAKOS), Asia-Pacific Knee, Arthroscopy and Sports Medicine Society (APKASS), Turkish Society on knee surgery and Sports Traumatology (TUSYAD), and Pan Arab Orthopedic Association.

We have tried to keep up with the global trend and to meet the professional and social demands. We have established many fellowship training programs related to ISKAST's mission in our major universities as well as the private hospitals. We held the 1st International Biennial Congress of Iranian Society of Knee Surgery, Arthroscopy, and Sports Traumatology in January 2010 in Kish Island. The second and third international ISKAST were also held in Kish Island in February 2012 and February 2014, respectively, with a great team of international speakers. We had our 4th meeting in Tehran in 2016 with impressive contribution of prestigious international faculties and speakers.

The 5th international ISKAST meeting is going to be held on February 14-17th, 2018, with participation of 35 outstanding international faculties. I'm sure this meeting would be one of the most successful ones in the region. All who are active and interested to the field of arthroscopy are most welcome to attend the meeting in the beautiful Kish Island.

Iranian Journal of Orthopaedic Surgery

www.ijos.ir

The "Iranian Journal of Orthopaedic Surgery" is the official scientific quarterly publication of Iranian Orthopaedic Association. Contributions from national and international researchers are welcome and are considered on their merits. Submitted manuscripts must be written in English. Authors are advised to follow the "Instructions to Authors" while submitting their manuscripts.

Manuscripts are subjected to primary screening by the Editor and then to blinded peer review by experts in the field and a final decision will then be made by the Editor. Papers are assessed according to the quality and relevance of the work, not by the country of origin, the reputation of the author, or the fame of the department. Our aim is to publish the best articles available in the field of orthopaedic surgery from anywhere in the world.

This Journal accepts Original articles, Review articles (Systematic and Narrative), Short Communications, Case Reports, and Letters to the Editor in the field of Orthopaedic Surgery.
